MODEL Z45L
Optic titanium contra-angle
1:4,2 Increasing
Two-Way spray Function
Ceramic ball-bearings
REF C1064

Kr 12.880

Superior accessibility

The 45-degree angled head allows easy access to the molar region, minimizing interference from the front teeth and adjacent teeth.

Two-way spray function

The world's first Two-Way spray function allows you to instantly choose a mist or jet spray depending on the conditions and procedure with an enclosed dedicated tool. The water jet spray prevents subcutaneous emphysema in surgical procedures, and the mist spray effectively cools the bur while cutting.

PREMIUM

nano series

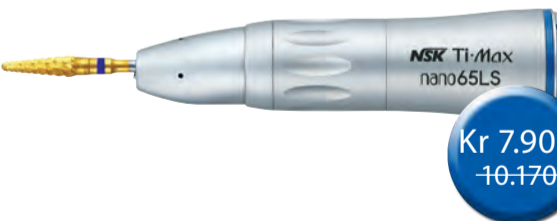

Smaller. Shorter. Perfect Balance.¹⁾

The NSK nano instruments are approx. 1 cm shorter and slightly lighter than the Ti-Max Z instruments that otherwise have the same features. Thus, in combination with a modern, short micromotor they are offering the same ergonomic handling as a dental turbine.

¹⁾ NOTE: Ti-Max nano series instruments are shorter than other instruments from NSK. They are compatible with the current micromotor range of NSK (NLX nano, NLX plus, M40XS, NBX, X205L, M205LG) and other micromotors available in the market which have an ISO coupling no longer than 23 mm.

DENTAL HYGIENE & PARODONTOLOGY

Varios Combi Pro

The variable 2-in-1 prophy combination

Ultrasonic Scaler and Powder-jet device in one unit - for an efficient and comfortable professional tooth cleaning and a reliable biofilm and concrement removal. Supraringivally as well as subgingivally.

1. Ultrasonic Scaler

Ultrasonic generator for all oscillating puposes in the dental hygiene field. Based on the established Varios technology with iPiezo engine.

2. Powder-jet

Powder-jet module featuring a complete separation of control unit and powder leading lines. Automatic function detection (supraringival/subgingival)

Consisting of:

- Control Unit
- Ultrasonic: handpiece, hose, bottle
- Powder Jet supraringival: handpiece, hose, powder chamber
- Multifunction Foot Control
- Accessories

MODEL Varios Combi Pro
Combination device for dental hygiene purposes for ultrasonic and powder-jet treatment in dental prophylactics.

VIVA MATE G5

Mobile micromotor with light

Wherever this mobile micromotor/control unit combination is used, in mobile denstistry or in the dental lab: thanks to its strong batteries it can be used totally independent even without a plug for up to 2 hours. With a rotation spectrum of 3,000 to 30,000 rpm it can be used for all types of dental applications when used with the right handpiece or contra-angle (not included in the set).
