## Prophylaxis Workflow

## Who has Periodontal Disease?

**More than 45% of all adults & 60% of over 65 year olds.**

Periodontal disease is inflammation of the gums, caused by the presence of bacteria at the gum line. There are two basic types of gum disease, gingivitis and periodontitis. Gingivitis is reversible but if not prevented can lead to periodontitis which is more serious as it is irreversible and destroys the bone around the teeth. Problems arise when bacteria are allowed to build up to form plaque

around the base of the teeth. If this is left undisturbed through poor brushing technique, poor dental hygiene or in hard to reach areas then the body will respond with inflammation. This can be seen as bleeding when brushing or eating and gums may appear red and swollen. Left untreated this can lead to gums receding to expose the roots of teeth and the teeth may fall out.

Kontakt oss på 5522 1900

## Effects on General Health

There is now evidence that the toxins and inflammation resulting from periodontal disease can also affect other parts of the body and influence other conditions. These include an increased risk of heart disease, an increased risk of diabetes and the possibility of complications during pregnancy.

More evidence for links between periodontal disease and other conditions is constantly emerging and strengthening. It is preventable and treatable, ask your dentist for details.

This combination of solutions helps dentists easily prevent and diagnose potential dental problems such as periodontal disease and tooth decay. It also allows to perform safe and minimally invasive procedures, providing best care and comfort for patients.

### Diagnosis

To ensure a reliable diagnosis, I need to get a quick and clear view of initial signs of caries, periodontal disease, and other conditions.

C50 intraoral camera is the perfect companion for non-invasive and reliable caries detection, thanks to its fluorescent technology.

### Treatment

I wish to carry out fast and accurate treatment, while reducing hand fatigue.

Newtron® P5XS B.LED and tips is the perfect combo to preserve tissues with efficacy and precision. Less force is needed for more comfort.

### Air polishing

It is important for me to control the progression of the disease, without neglecting the comfort of my patient.

With Air-N-Go® easy, provide a gentle and effective treatment that limits bleeding. Stains and bacterial plaque are removed even in hard-to-reach areas.

### Follow-up

In order to educate my patients for better treatment acceptance, I need to highlight the results of my dental care.

C50 provides a reliable and immediate check of the clinical condition. The images can be shown to the patient and saved to his file.

## sopix plug-in

High quality X-rays image for a reliable diagnosis

Combined with the X-MIND® unity intraoral X-ray generator, SOPIX® inside with ACE technology limits the emission of x-rays during the acquisition to the necessary amount for the patient's morphology. It uses the minimum dose required to provide a high-quality image.

**X-MIND® prime 3D wall mounted**

Cutting-edge CBCT technology enclosed in an essential and elegant style, fitting almost any space, even the narrowest ones.

**Kr 655 350**

**Kr 1 136 362**

**Kr 833 850**

**X-MIND® prime 3D cep**

The most comprehensive all-in-one ACTEON® imaging solution, all you need to successfully handle any patient type in any clinical landscape... always at your fingertips.

## Smart Software

### 56 2D and 3D programs

- Easy interface to use
- Complete 3D diagnostic tools, powered by AIS3DAPP, to fully exploit the clinical content from your cases
- The Implant Planning Wizard combined with a Cloud implant library allows you to easily and safely plan your surgery in just a few clicks
- The Surgical Guide Design option brings your planning to the surgical room with the highest fidelity possible with a custom designed surgical stent
- Effective patient engagement: export to portable viewer and involve the patient in the diagnostic process and raise his awareness to boost case acceptance

Panoramic standard - Implantology case assessment

Ceph 24x30 LL - Orthodontic treatment follow-up

3D Full dentition - Multiplanar Reconstruction

# PSPIX<sup>2</sup>

The first personal  
imaging plate scanner

- Compact design and easy to access: the smallest imaging plate scanner on the market for your personal convenience.
- Images in seconds: you no longer need to move to another room to scan your images.
- Featuring an exclusive "Click & Scan" concept, the new PSPIX® is totally intuitive: make your selection on the large touchscreen, drop in your imaging plate and let the PSPIX® do the rest...

reddot award 2015  
winner

**Ref. S\_702\_0013**

Delivered with 4 ERLM (2x size 1, 2x size 2), 200 protective bags (100x size 1, 100x size 2), an imaging plate storage box, 1 stylus for touchscreen, 1 protection bag for PSPIX<sup>2</sup> system, 1 power supply 100-240 VAC, 1 Ethernet cable, Sopro<sup>®</sup> Imaging and his license.
